EDUCATION

Harbor State University | B.B.A. in Finance | Metro City, USA | Sep 2016 - May 2020

EXPERIENCE

Stonebridge Manufacturing | Financial Analyst | Metro City, USA | Jan 2023 - Jun 2025

- Built the rolling 18-month cash-flow forecast for a USD 600M manufacturer, keeping monthly forecast error under 4% and letting treasury pay down USD 40M of revolver debt early.
- Cut the monthly close from 8 working days to 5 by automating 30 reconciliations and intercompany eliminations.
- Modeled the capital plan for 12 plant projects in a shared NPV template, so every request used the same discount rate and payback rules.
- Wrote the variance commentary for the monthly board pack, explaining each line more than 5% off budget.
- Presented the annual budget to the plant managers and finance director, and it was approved in one review cycle.
- Trained 5 plant controllers on the new budgeting template and wrote its user guide.

Crescent Bank | Credit Analyst | Metro City, USA | Jul 2020 - Dec 2022

- Underwrote 60 small-business loans worth USD 45M, and none of the approved loans defaulted in their first two years.
- Reviewed 3 years of declined applications; the findings changed two ratio thresholds and raised approvals from 41% to 48% with no rise in early defaults.
- Wrote the covenant-monitoring checklist for the portfolio, cutting missed covenant tests from 7 to 1 a year.
- Built a spreading template for borrower financials that cut each credit memo from 6 hours to 3.

PROJECTS

Regional Utility Valuation | Independent Project | Excel | Nov 2024 - Present

- Valued a listed regional utility with a 10-year DCF and a comparable-company check, landing within 6% of the market price.
- Tested the valuation's sensitivity: a 1-point change in the discount rate moved the share value from USD 52 to USD 44.
- Shared the model and a two-page note with the university investment club, which used it in its spring pitch.

Student Investment Fund | Analyst, Team of 6 | Excel | Sep 2018 - May 2019

- Pitched two mid-cap industrials to the fund committee; both were bought and returned 14% over the following year.
- Rebuilt the fund's performance report to show returns against its benchmark, which the committee used at every meeting.
- Wrote onboarding notes on the fund's models for new analysts.

SKILLS

Tools: Excel

Methods: financial modeling, DCF valuation, forecasting, credit analysis
