

Casey Morgan

+1 (555) 010-7731 | casey.morgan@example.com | example.com/portfolio/cmorgan

Date of birth: 3 Mar 1997 | Nationality: Canadian

EDUCATION

Lakeshore University | B.A. in Cognitive Science | Metro City, USA | Sep 2015 - May 2019

EXPERIENCE

Northwind Health | UX Research Associate | Metro City, USA | Jul 2019 - Feb 2022

- Owned the monthly patient survey and the reporting dashboard the care teams used.
- Interviewed 40 patients about appointment reminders; my findings led to a two-way text reminder that cut missed appointments from 14% to 9%.
- Wrote the screener and consent templates for all patient studies, cutting study setup time from two weeks to three days.
- Tested the telehealth waiting-room screens with 16 older patients; the revised layout cut support calls about joining a video visit by 30%.

Pinegrove Financial | Senior UX Researcher | Metro City, USA | Mar 2022 - Jun 2025

- Led research on the mobile onboarding flow, testing three prototypes with 24 new customers; the shipped design raised completed sign-ups from 41% to 58% in the quarter after launch.
- Improved dispute-form completion by 40% by splitting the form into three short steps with saved progress.
- Ran 18 moderated usability sessions a quarter from a recruiting panel of 400 customers, so every major release was tested with real account holders before launch.
- Synthesizing 60 interviews, 400 survey responses and 18 months of support tickets through affinity mapping, journey mapping and a tagged clip library, cut repeat support calls about statements by 23%.
- Raised the onboarding flow's System Usability Scale score from 68 to 104 across two rounds of moderated testing with 20 customers.
- Validated the redesigned app navigation's findability with an open card sort of 30 customers before it shipped.

PROJECTS

Accessible Transit Map | Independent Project | Figma | Sep 2024 - Present

- Redesigned a city transit map for screen-reader and low-vision riders, and tested it with 12 participants on timed route-finding tasks.
- Cut median route-finding time from 90 to 60 seconds, a 50% improvement, by adding audio landmarks and high-contrast line colors.
- Published the design files and test protocol openly, and the city's transit agency invited the project to its spring accessibility review.

Community Clinic Booking Redesign | Volunteer, Team of 3 | Figma | Mar 2023 - Aug 2023

- Conducted user interviews and created wireframes for a free clinic's online booking flow.
- Recruited 10 clinic patients and ran two rounds of hallway testing, fixing the six issues that stopped first-time users from finishing a booking.
- Wrote the clinic's volunteer handbook for maintaining the booking pages, which two later volunteer teams used to add Spanish-language booking.

SKILLS

Tools: Figma, screen-reader testing (VoiceOver, NVDA)

Methods: moderated and unmoderated usability testing, interviews, surveys, A/B testing
